ECO BRICK COLLECTION

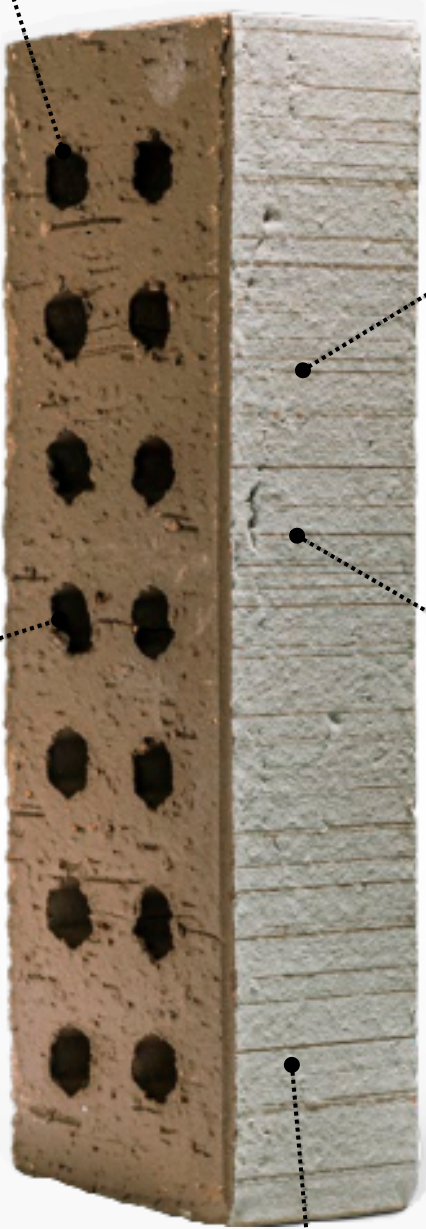

ELIGINA SPEC GUIDE

LOHASAU.COM

Eco-brick is the perfect choice for environmentally aware housebuilders

Eco-brick offers all the benefits and features of traditional ceramic facing bricks, but in a slimmer format: An Eco-brick is 35 mm narrower, without compromising durability, strength or stability. The slimline size means 30% more can be fired on a kiln car at any one time. On a like-for-like brick this dematerialisation (doing more with less) results in reducing our overall CO₂ impact.

Linear oblong format

Sleek

Pure

Organic tones

Unique sandless texture

Organic colors, linear look

-

Light and lines encapsulate the subtle essence of this brick. Its gracefully refined design and elongated dimensions emphasise horizontality, offering a modern canvas for personalised architecture with a gentle, relaxed character.

When it comes to colours, this brick embraces a pristine palette of organic tones. Whether you choose white, gray, red, or black, each version exudes timeless elegance. The interplay of light stripes and the delicate, smooth, grained structure imbues character into every Eligina contemporary architectural project.

Available in the slim Eco-brick format

-

Eligina stands as an outstanding choice in terms of sustainability. Certain facing bricks are also available in a slimmer Eco-brick format, providing an additional 3.5 cm of space for insulation or expanding living areas. This eco-conscious approach not only enhances energy efficiency but also promotes a greener and more spacious living environment.

ELIGINA

COLOUR RANGE
